Subject: WV Charleston Chemical Spill sources of information

Hi Steve, Vicky, Bonnie, Lora and Helen,

I called the WV JIC to see how they were handling media requests for sampling results. I was directed to the WV Division of Homeland Security and Emergency Management webpage where they are posting water sampling results. the link is:

www.dhsem.wv.gov/Pages/WV-American-Water-Emergency.aspx

If the link doesn't work, go to the www.dhsem.wv.gov homepage and click on the glass of water image that says "Water Do Not Use Emergency." You may have to wait for the image to pop up.

Don't click on the red text box above it that says WV America Water Kanawha Valley Customers." That will take you to the water company's site.

The WV Homeland Security webpage has a ton of info, including flushing guidelines, sampling data, health advisories, etc....

Hope this is helpful. Call if any questions. Thanks.
